BUSINESS PROPOSAL
FOR LAW FIRMS · 2026

LEGAL PRACTICE · AUTOMATION · GROWTH

YOUR CASES DESERVE YOUR MIND — NOT YOUR PAPERWORK.

Every day, hearing dates tracked in diaries, case files buried in almirahs, clients calling to ask "**what happened in my case?**", and hours lost drafting the same documents again. We build software that runs your practice for you — **organized, instant, and confidential**. This proposal shows exactly how.

YOUR PRACTICE RUNS ON MEMORY, DIARIES & PAPER FILES

A growing practice means more cases, more clients, more documents — but the tools running it haven't changed in decades. The cost isn't just time. It's missed dates, lost files, and clients who quietly move to another firm.

WHAT THIS LOOKS LIKE DAILY

- Hearing dates tracked in **pocket diaries and memory** — one slip means an adjournment or worse
- Case files stacked in almirahs — **20 minutes to find** one order sheet
- Clients calling all day asking **"what happened at the hearing?"**
- The same bail applications, notices and agreements **drafted from scratch** every time
- Fee records scattered across registers, WhatsApp and memory

WHAT IT'S REALLY COSTING

- **Missed dates** — one forgotten hearing can damage a case and a reputation built over years
- **Unbilled work** — hours of drafting, calls and visits that never make it to an invoice
- **Client trust** — silence between hearings feels like neglect, even when you're working hard
- **Clerk dependency** — when the munshi is absent, the whole office slows down
- **No confidentiality control** — paper files can be read, copied or lost by anyone

THE SIMPLE TRUTH

You studied law to **argue cases and win them** — not to chase files, dates and payments. Software carries the administrative weight of the practice **24 hours a day, with zero forgotten dates**, for less than the cost of one junior clerk.

10 sec

TO PULL UP ANY CASE, ORDER
OR CLIENT — FROM ANY DEVICE

WEEK 1

All active cases, dates and files moved into one system

MONTH 1-3

Automatic date alerts, client updates and drafts — hours returned every week

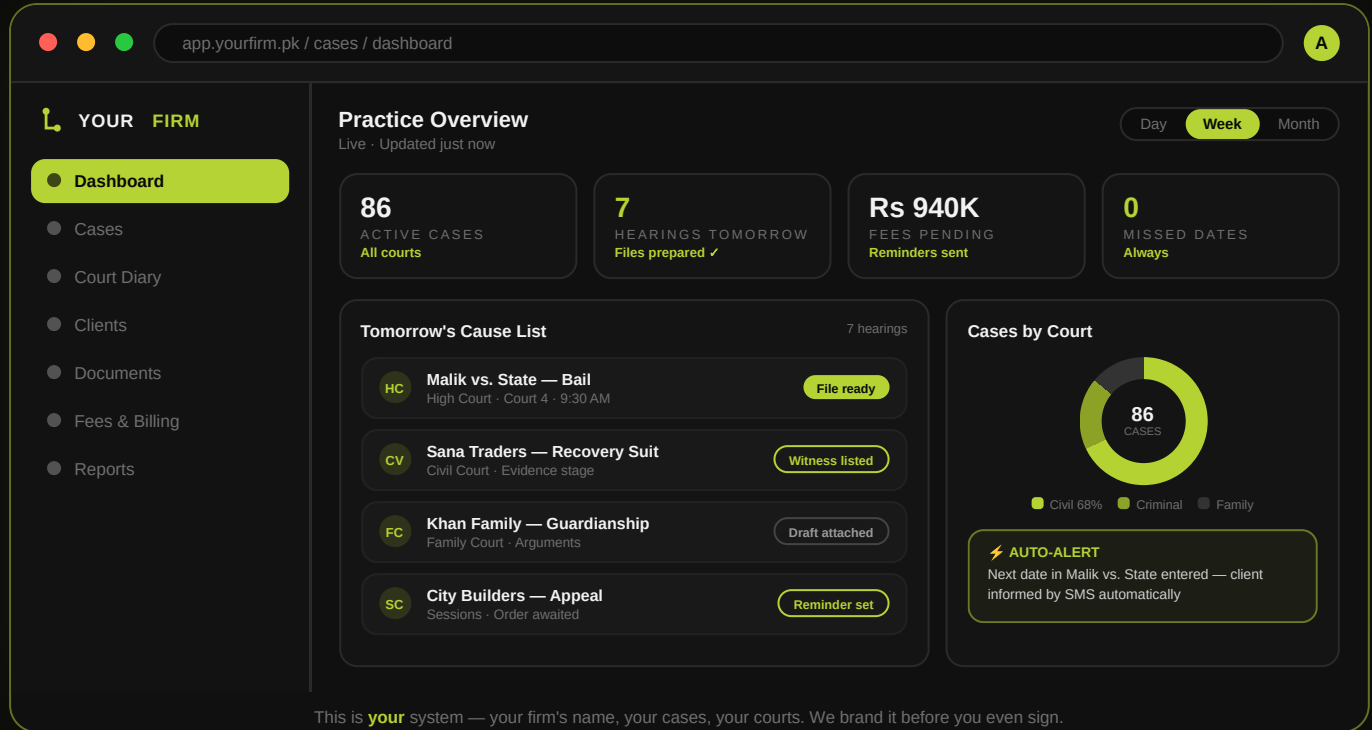

YEAR 1+

The firm handles 3× the cases on the same team — nothing slips

EVERY CASE. EVERY DATE. ONE SCREEN.

Your entire practice — cases, hearing dates, clients, documents and fees — organized in one secure system. Tomorrow's cause list is ready before you ask for it.

IN SIMPLE WORDS

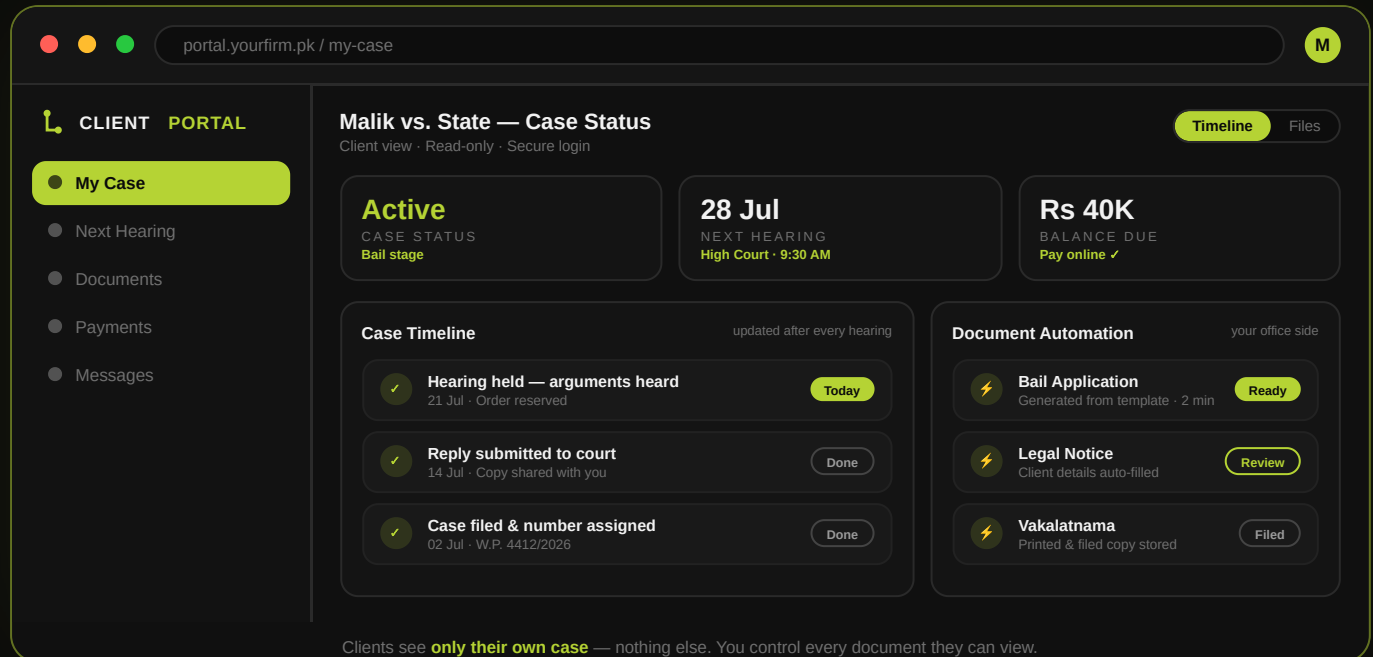

- Every hearing date entered once — the system **reminds you, your team and your client** automatically
- Open any case and see its **full history**: orders, dates, documents, payments — in seconds
- Munshi absent? **Nothing stops**. Every record is in the system, not in one person's head

BUILT FOR

- Advocates managing **50+ active cases** across multiple courts
- Firms where dates, files and fees live in **diaries and registers**
- Chambers with juniors and clerks who need **controlled access** — everyone sees only what you allow

CLIENTS STOP CALLING. THEY START TRUSTING.

A private portal where each client logs in and sees their own case — status, next date, and documents you choose to share. Meanwhile, your standard drafts generate themselves in minutes, not hours.

IN SIMPLE WORDS

- After every hearing, one update in the system — **the client sees it instantly**. No more 15 calls a day
- Standard drafts — notices, applications, agreements — **generate in minutes** from your own templates
- Every filed document scanned once, **found forever** — searchable by case, client or date

CONFIDENTIALITY, BUILT IN

- **Role-based access** — juniors, clerks and clients each see only what you permit
- **Your data stays yours** — private, backed up daily, never shared
- Every view and download is **logged** — you always know who opened what

EVERY CALLER ANSWERED. EVERY CASE PROTECTED.

A smart assistant that answers your office line — during hearings, after hours, on holidays. It handles new client inquiries, books consultations into your real calendar, and saves every caller's details into your system. Automatically.

ON EVERY CALL, IT

- **Answers instantly, 24/7** — even while you're on your feet in court
- **Talks naturally** — in Urdu or English, and answers common questions about your practice areas
- **Books consultations** — checks your live calendar; double-booking impossible
- **Handles existing clients** — shares next hearing date without disturbing you mid-argument

AFTER EVERY CALL, AUTOMATICALLY

- Caller saved into your system — **no typing by anyone**
- Short summary of the matter: **type of case, urgency, contact**
- Urgent matters flagged and **forwarded to your WhatsApp** immediately

AI RECEPTIONIST · LIVE

● On call — 11:42 PM

Assalam-o-alaikum! You've reached the chambers. How can I help you today?

I need a lawyer urgently — my brother was detained this evening.

I understand — this sounds urgent. The advocate handles criminal matters. Can I take the case details and arrange a call **first thing tomorrow at 8:30 AM**? I'm also flagging this as urgent right now.

✓ SAVED & FLAGGED — AUTOMATICALLY

New inquiry · Criminal — detention matter · Marked URGENT ▾
Forwarded to advocate's WhatsApp · Callback 8:30 AM booked ✓

A real conversation — while you were preparing tomorrow's arguments.

Every missed call is a client who called the next firm on the list. In legal work, the first lawyer to respond usually gets the case. The AI Receptionist turns after-hours and in-court callers into **booked consultations** — without hiring anyone to sit by the phone.

NEED SOMETHING DIFFERENT? WE BUILD IT.

Beyond case management, portals and AI — we build **custom software shaped around how your chamber works**: multi-branch firm systems, corporate client dashboards, court-fee calculators, archive digitization of old files. If a manual process exists in your practice, we can automate it.

THE SIMPLE MATH — PAPER PRACTICE VS. SMART PRACTICE

RUNNING ON DIARIES & FILES		LATECH SYSTEM
DATES	Tracked in diaries and memory — one slip harms the case	Automatic alerts to you, your team and your client — zero missed dates
FILES	20 minutes searching almirahs for one order sheet	Any case, order or document in 10 seconds — from office, court or home
CLIENTS	Calling all day for updates; silence feels like neglect	Private portal — clients see status themselves and trust you more
DRAFTING	Same documents typed from scratch, again and again	Generated from your templates in minutes — details auto-filled
FEES	Balances in registers; awkward reminder calls	Every payment tracked; polite reminders sent automatically
IF STAFF LEAVES	Knowledge walks out with the munshi	Everything stays safely with the firm — searchable forever

FOUR STEPS. ZERO RISK.

01

FREE CONSULTATION

30 minutes at your chamber or online. We map how your practice runs today and where **time and money leak**.

02

DEMO, YOUR FIRM'S NAME

A working system carrying **your firm's name and sample cases** — see it before spending anything.

03

14-DAY FREE PILOT

Live with your real active cases. Your team uses it daily. **You judge the results yourself.**

04

FULL ROLLOUT

We digitize your case records, train your staff and stay on support. **You gain from day one.**

ZERO-RISK START. EVERYTHING TO GAIN.
